windowless rooms

Of additional concern is the number of core classrooms and shared spaces that do not receive any natural daylight, shown shaded in the diagram above. Experiencing natural daylight has been proven to be extremely important to students and staff who spend most of their days in a single classroom. The incorporation of daylighting also increases the performance of mechanical and electrical systems.

## **Visual Evidence of Deficiencies**

Uninspiring and antiquated program organization

Isolated classrooms are a challenge for administrators to organize class schedules around

Corridors and classroom entries lack transparency, connectivity, and personality

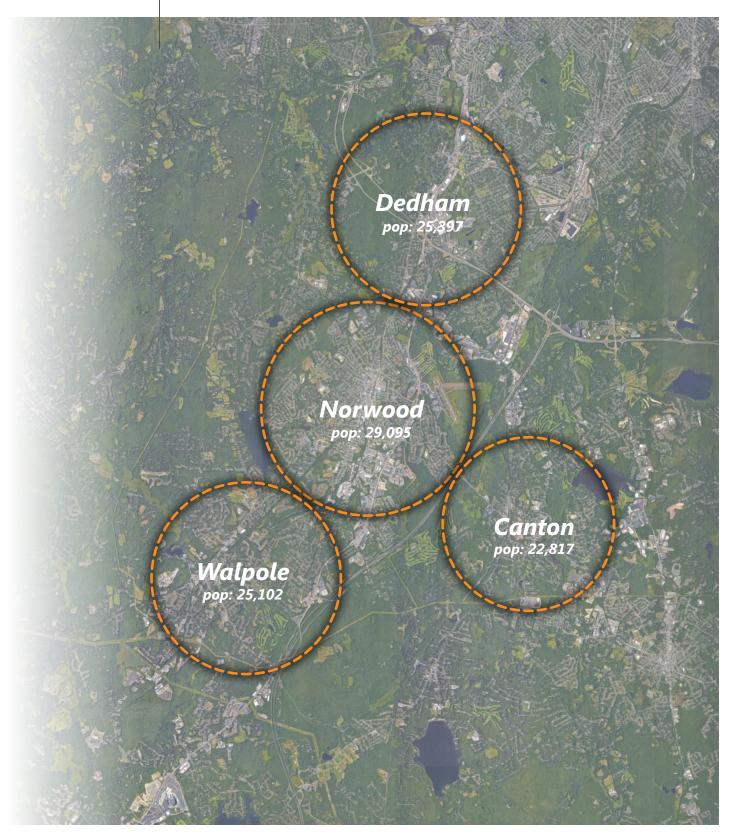

The only space dedicated to collaboration between students or staff is a storage-closet sized room at the interior of the school

Inadequate and outdated STEM facilities

Modular classrooms have become permanent fixtures, despite signs of deterioration

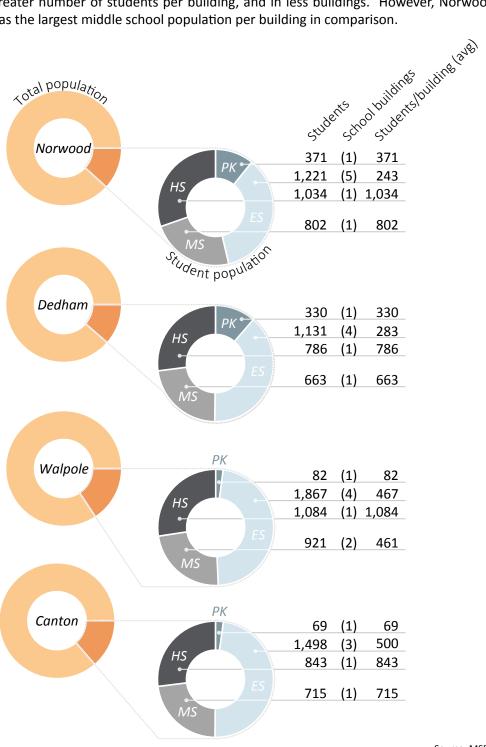

Communities that border the town of Norwood include Dedham, Canton, and Walpole; all of similar populations

## **Surrounding Communities**

# Analysis & Grade Configurations

On average, the elementary schools in communities surrounding Norwood house a greater number of students per building, and in less buildings. However, Norwood has the largest middle school population per building in comparison.

Feasibility Study & Long Range Plan - Norwood Public Schools

## IV.

## **Evaluation of Alternatives**

## **Primary Considerations**

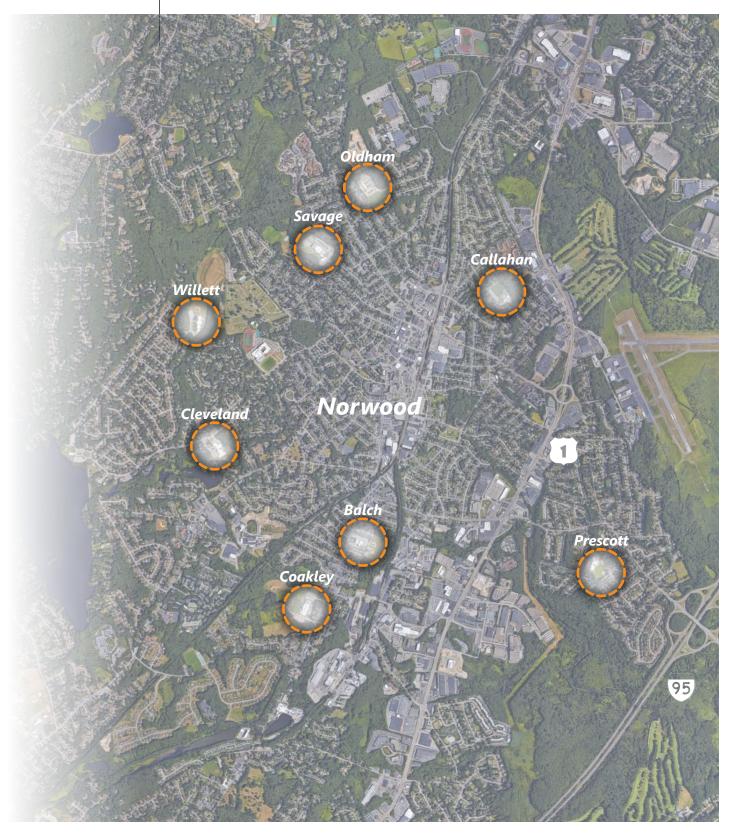

Subsequent to the submittal of the Preliminary Design Program, the Designer and the Building Committee have been working collaboratively with the Town of Norwood to further refine the Space Summary, review the Educational Program, and develop multiple options for overall consideration. Familiarity with the Town was established early on through organized walkthroughs of each building in question and scheduled meetings with key administrative personnel. Community outreach presentations were also prevalent in the establishment of alternative options.

The Town of Norwood is currently responsible for the operation and maintenance of nine educational buildings, including Norwood High School. The upkeep of this many buildings, most of which are over 50 years old, is a strain on town resources and staff. This means that the total available maintenance budget must be divided up nine times every year, with increasing difficulty as the buildings and their systems continue to age. Unfortunately, as each building ages, it does not increase in size. According to NESDEC, the New England School Development Council, enrollment in Norwood is projected to increase over the next decade. Not only will the existing facilities cost more to maintain, but they will struggle to comfortably accommodate the amount of students in attendance; in fact, all elementary schools (with the exception of Oldham) are already on the cusp of congestion.

Solutions to such a conflict range from building an additional elementary school in a new community, to consolidation of all through new construction. These are just a few considerations that were factored in when theorizing solutions. In summary, the following are the considerations that guided the options of this study:

- Consideration of reducing the number of buildings in operation
- Consideration of how to accommodate a growing student population
- Consideration of consolidating all elementary schools versus the continued operation of community elementary schools
- Consideration of the impact that adding and/or removing a facility in a location would affect that community
- Consideration of phasing; how students and programs will continue to be accommodated if an existing facility is to undergo renovations

Existing conditions: Buildings in operation within the Town of Norwood, today

## **Existing Conditions**

In establishing the real issues with the facilities of Norwood, a look at the purpose of architecture in general is helpful. A building serves its inhabitants; it acts as a vessel capable of facilitating the functions within. Successful buildings essentially operate on the periphery, where an inhabitant is in no way negatively affected by its deficiencies. There is a balance between flexibility and purpose, all within a comfortable amount of space. When the functions intended are inhibited, or are no longer possible because of the architecture itself, the building is rendered unsuccessful and in need of change.

For a school, the comfortable square footage per student is a critical factor. In truth, the highest performing school in the Town of Norwood is that with the highest square footage per student ratio: Oldham Elementary School. In the other buildings, the idea that the school is unable to pursue new curricula due to insufficient space is a common theme, and as a result, a justification that the buildings are unsuccessful.

#### **Existing Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Site Size (acres)	3	10	18	15.5	10	22	14	17
Existing Grades	1 - 5	1 - 5	1 - 5	1 - 5	1 - 5	PK - K	6 - 8	N/A
2017 Students (#)	306	230	349	218	262	385	756	0
2027 Students (#)	318	242	361	230	274	406	787	0
Existing (sf)	51,800	33,500	49,000	39,500	36,000	38,500	128,000	122,000
Existing sf per student (sf)	169	146	140	181	139	100	169	N/A

#### **Over-crowding**

Over-crowding occurs when the total square footage is divided by the student population, and each student isn't receiving a comfortable amount of square feet. In this regard, the Norwood schools suffering from over-crowding are: Cleveland Elementary by 40 students, Willett by 50 students, and Coakley Middle School by 60 students.

## Comparison of Options

## **Summary of Options**

The proposed options are detailed in the following pages, but fall into these categories, which range from most buildings in operation to least:

## Type 1: retain 5+ neighborhood elementary schools

- Option 1A Construct a sixth elementary school to alleviate over-crowding
- Option 1B Redistribute pre-K and kindergarten to each community school
- Option 1C Construct additions at Willett and Cleveland
- Option 1D Move fifth grade to a new middle school, and kindergarten classes return to neighborhood elementary schools

### Type 2: retain 4 neighborhood elementary schools

- Option 2A Cleveland absorbs Callahan population; reuse Callahan for district
- Option 2B Cleveland absorbs Callahan population; close Callahan
- Option 2C Cleveland absorbs Willett population
- Option 2D Combine middle school and early education; 4 elementary schools

## Type 3: retain 3 neighborhood elementary schools

- Option 3A Oldham absorbs Callahan population; close Callahan
- Option 3B Oldham absorbs Callahan population; reuse Callahan for district
- Option 3C Oldham and Cleveland receive additions; Prescott also remains

## Type 4: partial consolidation

- Option 4A Combine elementary school and early education in 1 new school, with a 5-8 middle school
- Option 4B Combine elementary school and early education in 2 new schools, with a 5-8 middle school
- Option 4C Combine elementary school and early education in 2 new schools, with a 6-8 middle school

### Type 5: total consolidation

- *Option 5A* Combine elementary schools and middle into 1 new school; separate early education facility
- *Option 5B* Combine elementary schools, middle, and early education into 1 new school

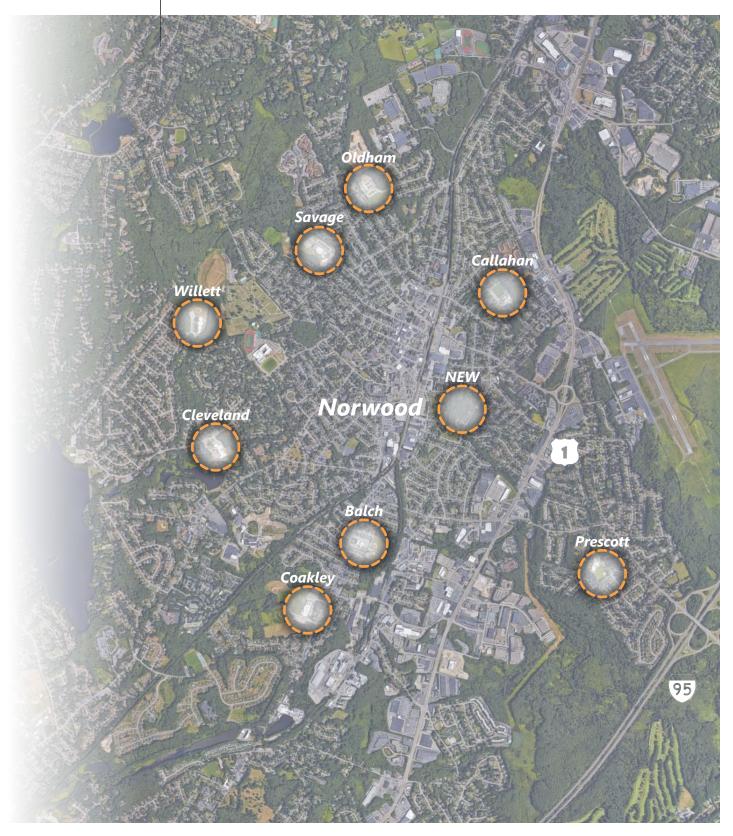

The following table and chart compare total project costs of all options, as well as the number of buildings that will continue in operation after all phasing is complete.

<sup>\*(\$)</sup> amounts represent the magnitude of cost per option based on 2017 values, and have been included to provide a datum of comparison between options.

## **Summary of Costs per Option**

Option 1A: Buildings remaining in operation within the Town of Norwood

## Option 1A

This option builds an additional elementary school on the Hennessey site; a centrally-located, 11-acre plot also owned by the Town of Norwood. By adding a sixth elementary school, crowding at the existing schools will be eliminated, allowing the re-implementation of kindergarten per neighborhood school and freeing up Willett to be used solely for pre-k. This option also includes a new middle school on the Coakley site.

## **Proposed Grade Levels & Square Footages per School**

new construction renovations

Note: Use of Hennessey Field is one example of a new school site; however, further investigation into the best available site will occur if this option is chosen.

## **Advantages**

- By constructing a sixth elementary school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- Elementary schools are still easily accessible from any neighborhood
- Early education will be easily accessible from any neighborhood
- Phasing is simple and does not disrupt students at all

### **Disadvantages**

- Increases the number of buildings that the department of Buildings and Grounds will be responsible for from eight to nine, plus the high school
- Kindergarten classes will have to decrease in the number of students per class in order to fit comfortably within the existing, smaller classrooms at the other schools
- Extended time frame required to complete all renovations and capital improvement projects required at each elementary school to re-distribute grades
- Extremely high cost over time to maintain so many buildings
- Site is topographically varied and requires much clearing and excavation

## **Operatives & Phasing**

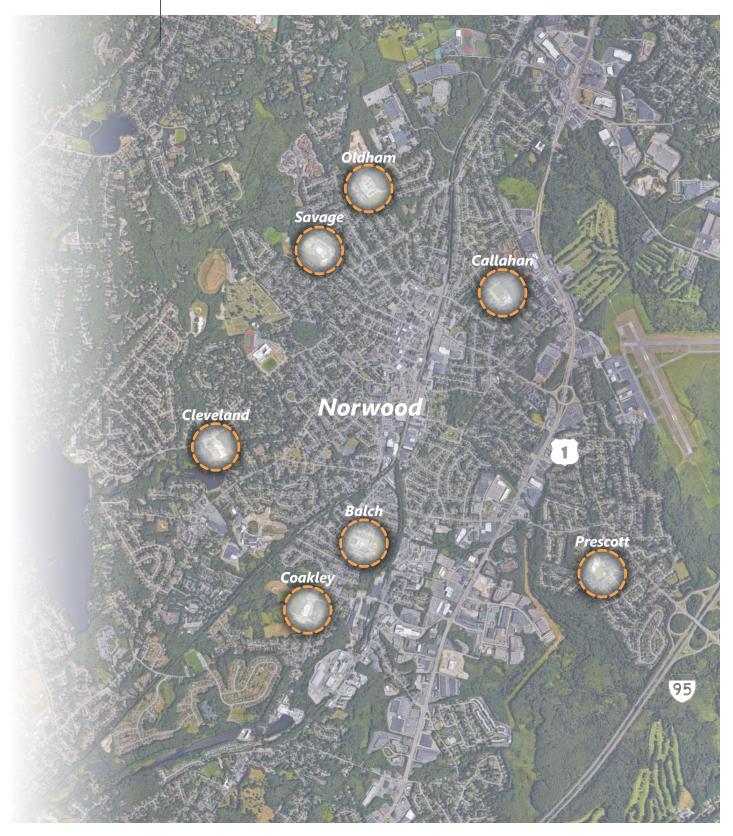

Phase I = complete 2020

• New middle school for grades 6 to 8 on Coakley site

Phase II = complete 2023

• (+) kindergarten to grade 5 at new elementary school on Hennessey site Phase III = ongoing

- Savage operates as is with capital repairs
- (+) kindergarten to Balch with capital repairs
- (+) kindergarten to Callahan with capital repairs
- (+) kindergarten to Cleveland with capital repairs
- (+) kindergarten to Oldham with capital repairs
- (+) kindergarten to Willett with capital repairs
- Willett operates as is, but with pre-k only

Option 1B: Buildings remaining in operation within the Town of Norwood

# Option 1B

This option constructs a new middle school that removes all fourth and fifth grades from the elementary level in the first phase. As a result, early childhood programs are able to return to all neighborhood elementary schools and over-crowding is eliminated.

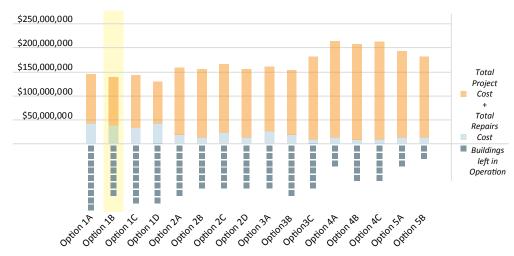

## **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage

\$139,581,904	Total Sum (\$)

## **Advantages**

- Reduces number of buildings in operation from eight to seven
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- Elementary schools are still easily accessible from any neighborhood
- Early education will be easily accessible from any neighborhood

## Disadvantages

- Early education classes will have to decrease in the number of students per class in order to fit comfortably within the existing, smaller classrooms at the other schools
- Extended time frame required to complete all renovations and capital improvement projects required at each elementary school to re-distribute grades
- The department of Buildings and Grounds will still be responsible for maintaining seven buildings, plus the high school

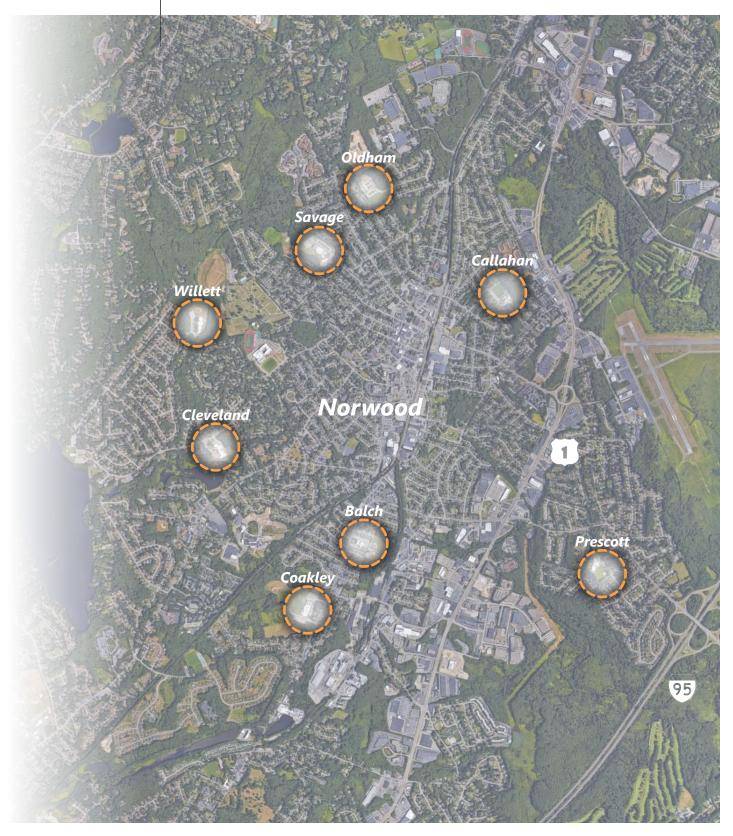

### **Operatives & Phasing**

Phase I = complete 2020

- (+) grades 4 and 5 to new middle school on Coakley site
- (+) kindergarten and pre-k divided amongst elementary schools; close Willett

Phase II = ongoing

- Capital repairs to existing elementary schools
- Savage operates as is with capital repairs

Option 1C: Buildings remaining in operation within the Town of Norwood

# Option 1C

This option directly addresses the existing over-crowding at Cleveland Elementary and Willett by providing additions to both. Though the most expensive of Type 1 proposals, this option includes full renovations of Cleveland and Willett because of their additions. A new middle school on the Coakley site is also proposed.

## **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage

## **Willett Early Childhood Center**

new construction renovations

first floor

## **Advantages**

- By constructing a new middle school, the design can be tailored to fit the needs of the community
- By eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- Elementary schools are still easily accessible from any neighborhood
- Single-phase construction possible
- Additions can be constructed over summer break to avoid disruption to students

### **Disadvantages**

- The department of Buildings and Grounds will still be responsible for maintaining eight buildings, plus the high school
- Does not plan for the long-term projection of over-crowding in the other community schools

### **Operatives & Phasing**

Phase I = complete 2020

• New middle school on Coakley site for grades 6 to 8

Phase II = complete 2022

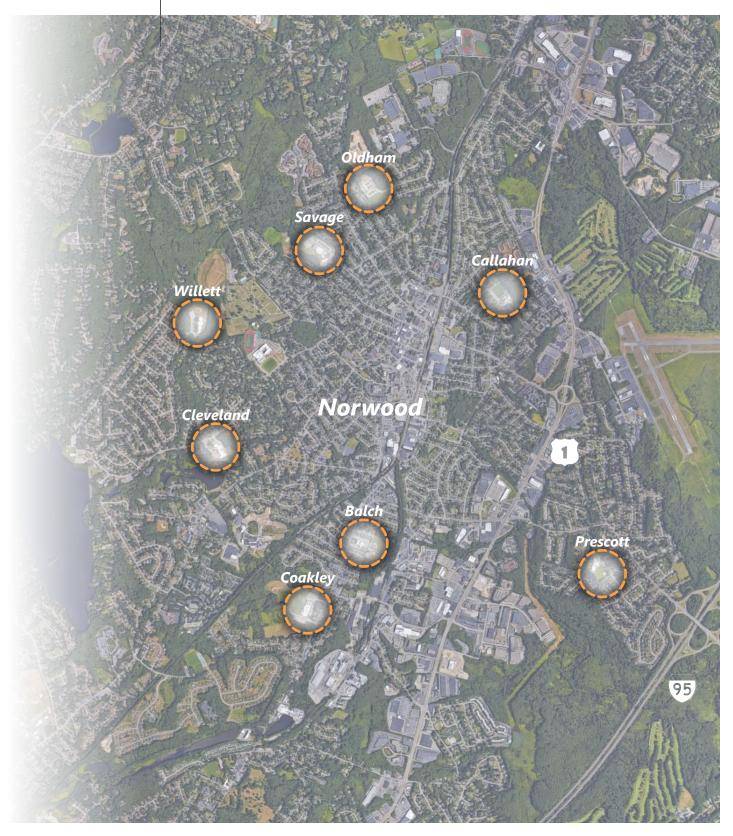

• Addition to Willett and comprehensive renovation

Phase III = complete 2024

• Addition to Cleveland Elementary and comprehensive renovation

Phase IV = ongoing

• Balch, Callahan, Oldham, Prescott, and Savage operate as they are with capital repairs

Option 1D: Buildings remaining in operation within the Town of Norwood

# Option 1D

This option constructs a new middle school that removes all fifth grades from the elementary level in the first phase. As a result, kindergarten classes are able to return to all neighborhood elementary schools and over-crowding is eliminated. Willett can operate purely as a pre-k facility, without congestion.

## **Proposed Grade Levels & Square Footages per School**

media center & admin

classroom wing

## **Advantages**

- By constructing a new middle school, the design can be tailored to fit the needs of the community
- By moving grade 5 and eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- By moving kindergarten classes to neighborhood elementary schools, the Willett will no longer be over-crowded
- Elementary schools are still easily accessible from any neighborhood
- Single-phase construction with only one MSBA-funded project required

## **Disadvantages**

- The department of Buildings and Grounds will still be responsible for maintaining eight buildings, plus the high school
- Does not plan for the long-term projection of over-crowding in the other community schools

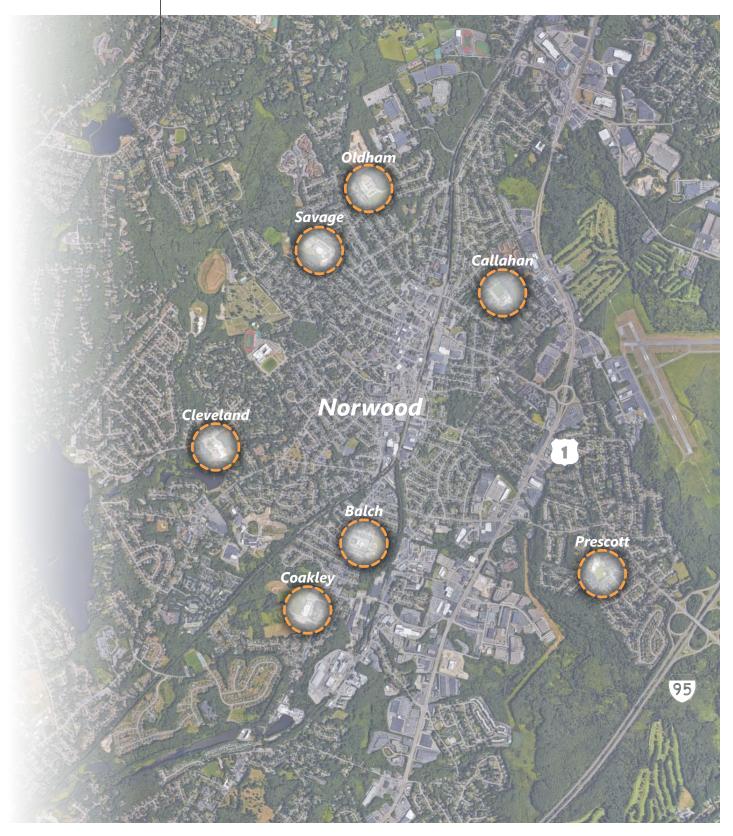

## **Operatives & Phasing**

Phase I = complete 2020

- New middle school on Coakley site for grades 5 to 8
- Re-distribute kindergarten classes to elementary schools

Phase II = ongoing

• Balch, Callahan, Cleveland, Oldham, Prescott, Willett and Savage operate as they are with capital repairs

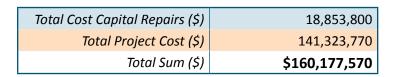

Option 2A: Buildings remaining in operation within the Town of Norwood

# Option 2A

This option makes use of the existing buildings by re-using Callahan for district offices and adding the early childhood programs into the Savage Center, while also reducing the number of buildings in operation by one.

## **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Proposed Grades	1 - 5	N/A	1 - 5	1 - 5	1 - 5		6 - 8	PK - K

Renovations (\$)			16,086,700					40,052,600
Additions (\$)			14,327,950					
New Project (\$)							70,856,520	
Priority Rating	IV	IV	II	IV	IV		1	III

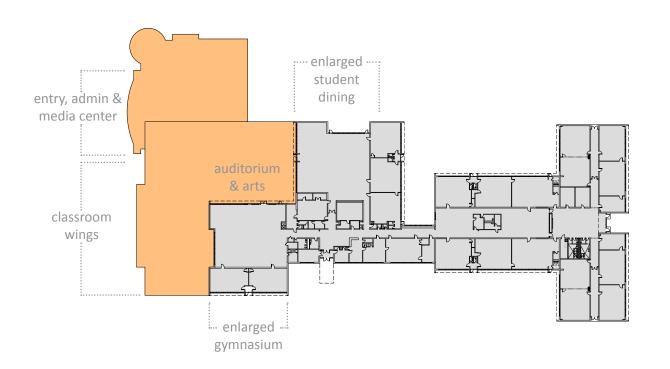

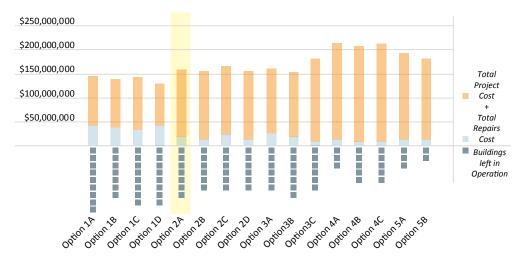

## **Cleveland Elementary School**

new construction renovations

first floor

## **Advantages**

- Reduces number of buildings in operation from eight to seven
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- The addition to Cleveland will relieve its current congestion
- Elementary schools are still easily accessible from any neighborhood

## **Disadvantages**

- The department of Buildings and Grounds will still be responsible for maintaining seven buildings, plus the high school
- Does not increase square footage per student at Balch, Oldham, or Prescott

## **Operatives & Phasing**

Phase I = complete 2020

• New middle school on Coakley site for grades 6 to 8

Phase II = complete 2022

 Addition to Cleveland Elementary and comprehensive renovation; absorbs Callahan population

Phase III = complete 2024

• (+) kindergarten and pre-k moved to Savage, which receives comprehensive renovation to accommodate the new programs; close Willett

Phase IV = ongoing

- Balch, Oldham and Prescott operate as they are with capital repairs
- Callahan becomes district offices

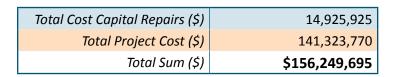

Option 2B: Buildings remaining in operation within the Town of Norwood

# Option 2B

This option is a variation of Option 2A, as it also moves the early childhood programs into the Savage Center but keeps the district offices there as well. As a result, two buildings can be closed, leaving six in full operation.

## **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Proposed Grades	1 - 5		1-5	1 - 5	1 - 5		6 - 8	PK - K
2027 Students (#)	306		610	218	251		779	454
Existing (sf)	51,800		49,000	39,500	36,000			122,000
Proposed Add (sf)			30,550					
Existing + Add (sf)			79,550					
New (sf)							151,080	
Cap. Repairs (\$)	6,073,550			4,631,375	4,221,000			
Renovations (\$)			16,086,700					40,052,600
Additions (\$)			14,327,950					
New Project (\$)							70,856,520	
Priority Rating	IV		II	IV	IV		I	III

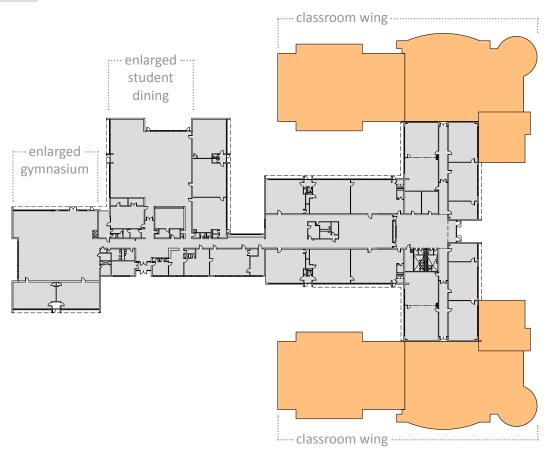

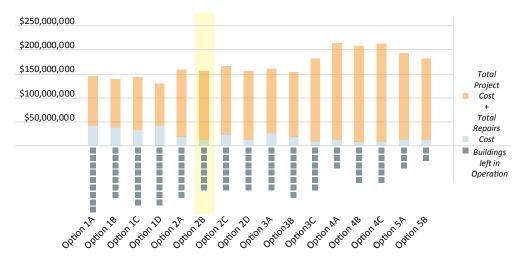

## **Cleveland Elementary School**

new construction renovations

first floor

## **Advantages**

- Reduces number of buildings in operation from eight to six
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- The addition to Cleveland will relieve its current congestion
- Elementary schools are still easily accessible from any neighborhood
- Shorter time frame to complete phases because district offices are not moving

### **Disadvantages**

- The department of Buildings and Grounds will still be responsible for maintaining six buildings, plus the high school
- Does not increase square footage per student at Balch, Oldham, or Prescott

### **Operatives & Phasing**

Phase I = complete 2020

• New middle school on Coakley site for grades 6 to 8

Phase II = complete 2022

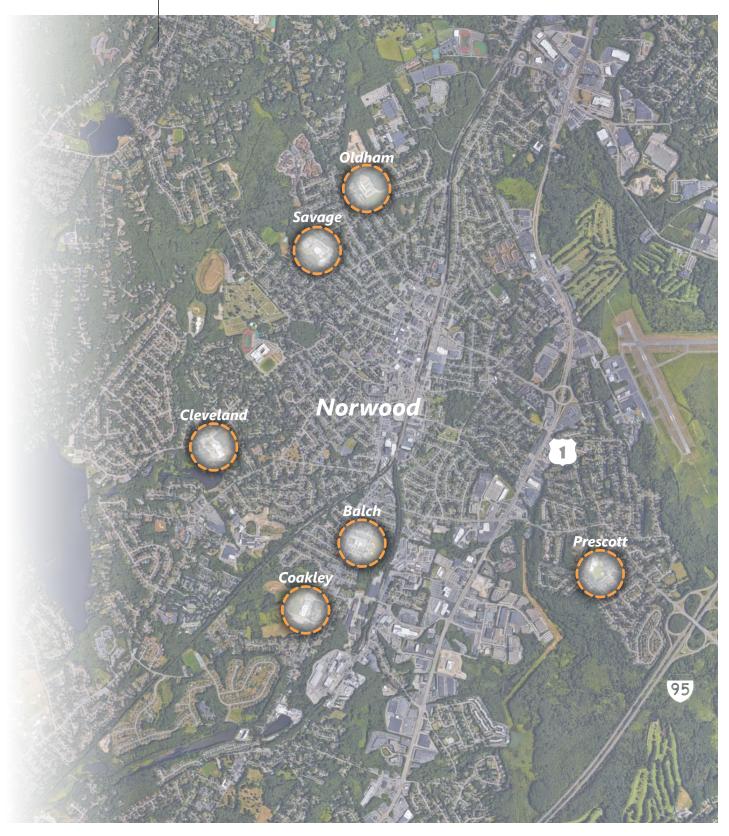

• Addition to Cleveland Elementary and comprehensive renovation; absorbs Callahan population and close Callahan

Phase III = complete 2024

• (+) kindergarten and pre-k moved to Savage, which receives comprehensive renovation to accommodate the new programs; close Willett

Phase IV = ongoing

• Balch, Callahan, Oldham and Prescott operate as they are with capital repairs

Option 2C: Buildings remaining in operation within the Town of Norwood

# Option 2C

This option reduces the number of buildings in operation, re-distributes students to retain community schools that are low in population, and moves early education to Cleveland in order to minimize the number of newly constructed additions required.

# **Proposed Grade Levels & Square Footages per School**

Total Sum (\$)	\$166,790,470

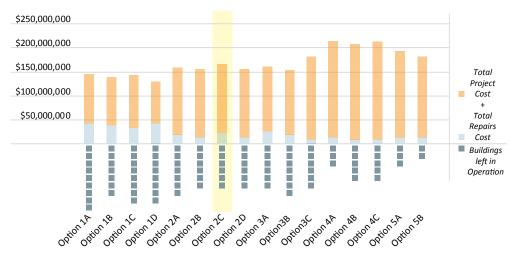

# **Cleveland Elementary School**

first floor

#### **Advantages**

- Reduces number of buildings in operation from eight to six
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- The addition to Cleveland will relieve its current congestion
- Elementary schools are still easily accessible from any neighborhood

#### **Disadvantages**

- The department of Buildings and Grounds will still be responsible for maintaining six buildings, plus the high school
- Does not increase square footage per student at Balch or Prescott

### **Operatives & Phasing**

Phase I = complete 2020

• New middle school on Coakley site for grades 6 to 8

Phase II = complete 2022

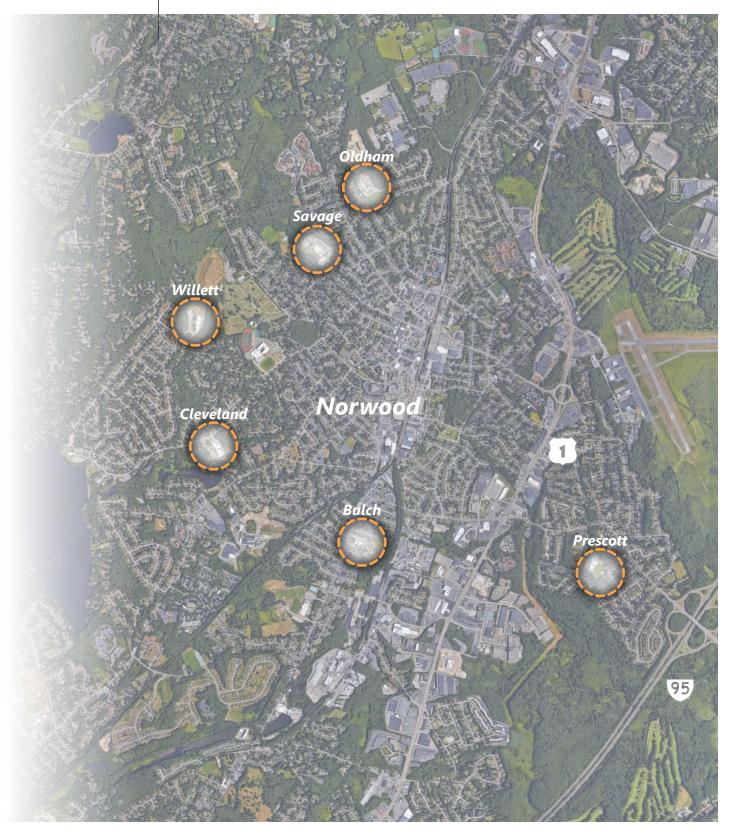

• (+) kindergarten and pre-k to Cleveland Elementary, which receives an addition and comprehensive renovation; absorbs Willett population and close Willett

Phase III = complete 2024

• Addition to Oldham Elementary and comprehensive renovation; absorbs Callahan population and close Callahan

Phase IV = complete 2024

• Balch, Prescott, and Savage operate as they are with capital repairs

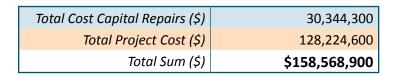

Option 2D: Buildings remaining in operation within the Town of Norwood

# Option 2D

This option accommodates student population by moving grade five to a newly constructed middle school added onto the Willett, and re-distributes students to retain community schools that are low in population. Oldham receives an addition.

# **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Proposed Grades	1 - 4		1 - 4	1 - 4	1 - 4	PK - K, 5 - 8		N/A

Proposed addition of a new middle school at Willett in order to relieve congestion there and at the other elementary schools

property line

# **Willett with Coakley Middle School**

# **Advantages**

- Reduces number of buildings in operation from eight to six
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- The addition to Willett will relieve its current congestion
- Elementary schools are still easily accessible from any neighborhood
- Single phase resolution

#### **Disadvantages**

• The department of Buildings and Grounds will still be responsible for maintaining six buildings, plus the high school

## **Operatives & Phasing**

Phase I = complete 2020

- comprehensive renovation to Willett with addition of the middle school
- (+) grade 5 to new middle school on Willett site for grades 5 to 8

Phase II = complete 2022

• Addition to Oldham Elementary and comprehensive renovation

Phase III = ongoing

• Balch, Cleveland, Prescott and Savage operate as they are with capital repairs

Option 3A: Buildings remaining in operation within the Town of Norwood

# Option 3A

This option reduces the number of buildings in operation, accommodates student population by moving grade five to a newly constructed middle school, and redistributes students to retain community schools that are low in population.

# **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage

# **Oldham Elementary School**

first floor

# **Advantages**

- Reduces number of buildings in operation from eight to six
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- Elementary schools are still easily accessible from any neighborhood

#### **Disadvantages**

- Longer construction time frame required to complete one new building, two additions, and the remaining renovations/capital improvement projects
- The department of Buildings and Grounds will still be responsible for maintaining six buildings, plus the high school

#### **Operatives & Phasing**

Phase I = complete 2020

• (+) grade 5 to new middle school on Coakley site for grades 5 to 8

Phase II = complete 2022

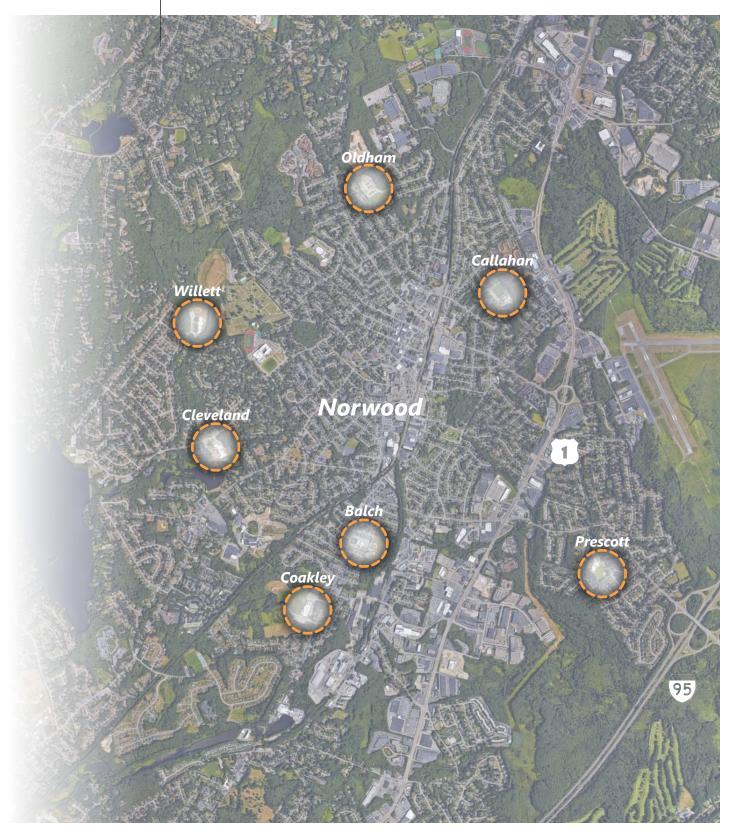

- (+) kindergarten and pre-k to Precott Elementary, which receives an addition and comprehensive renovation; absorbs Willett population and close Willett
- (-) grades 1 to 4 of Prescott; population re-distributed to other elementary schools

Phase III = complete 2024

• Addition to Oldham Elementary and comprehensive renovation; absorbs Callahan population and close Callahan

Phase IV = ongoing

• Balch, Cleveland and Savage operate as they are with capital repairs

Option 3B: Buildings remaining in operation within the Town of Norwood

# Option 3B

This option accommodates student population by moving grade five to a newly constructed middle school, re-distributes students to retain community schools that are low in population, and recycles two elementary schools for use as district offices and community program space.

# **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage

Total Cost Capital Repairs (\$)	20,260,800
Total Project Cost (\$)	136,919,860
Total Sum (\$)	\$157,180,660

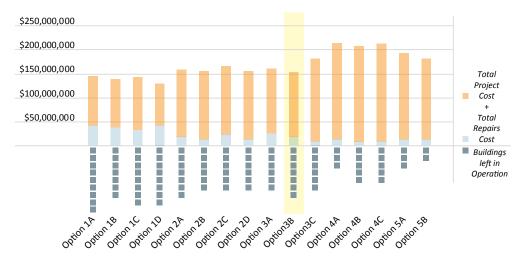

# **Prescott Elementary School**

first floor

# **Advantages**

- Reduces number of buildings in operation from eight to seven
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- Elementary schools are still easily accessible from any neighborhood

#### **Disadvantages**

- Longer construction time frame required to complete one new building, two additions, and the remaining renovations/capital improvement projects
- The department of Buildings and Grounds will still be responsible for maintaining seven buildings, plus the high school

#### **Operatives & Phasing**

Phase I = complete 2020

• (+) grade 5 to new middle school on Coakley site for grades 5 to 8

Phase II = complete 2022

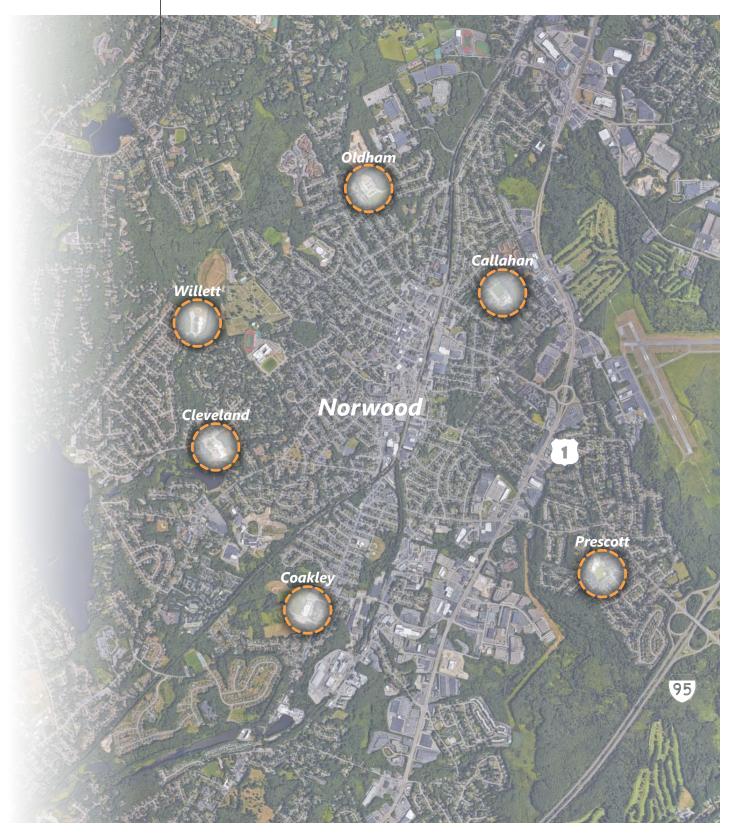

- (+) kindergarten and pre-k to Precott Elementary, which receives an addition and comprehensive renovation
- (-) grades 1 to 4 from Prescott; population re-distributed to other elementary schools

Phase III = complete 2024

 Addition to Oldham Elementary and comprehensive renovation; absorbs Callahan population and use Callahan for district offices; close Savage

Phase IV = ongoing

- Balch and Cleveland operate as they are with capital repairs
- Willett refurbished for community program use

Option 3C: Buildings remaining in operation within the Town of Norwood

# Option 3C

This option accommodates student population by moving grade five to a newly constructed middle school. Prescott, Cleveland, and Oldham will remain as the elementary schools for grade K-4, which are well distributed throughout the town. Willett will be exclusively available for pre-k, and the Callahan building can be used for district offices.

# **Proposed Grade Levels & Square Footages per School**

\$186,629,170	Total Sum (\$)

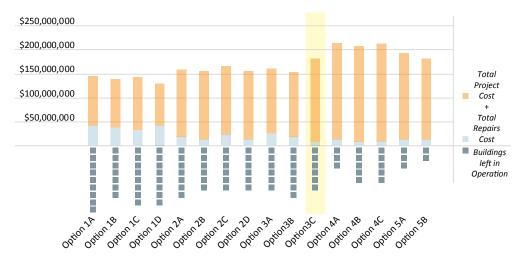

# **Oldham Elementary School**

first floor

# **Advantages**

- Reduces number of buildings in operation from eight to six
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By eliminating over-crowding, the town is better able to meet the goals of its educational visioning and program
- Elementary schools are equally distributed throughout the town and still easily accessible from any neighborhood
- The elementary school additions could be completed under the control of a single owner's project manager, designer, and contractor
- A single building committee could be established for both elementary school projects
- The completion of both elementary school projects could synchronize with the middle school so that they are complete before the middle school starts construction

#### **Disadvantages**

• The department of Buildings and Grounds will still be responsible for maintaining six buildings, plus the high school

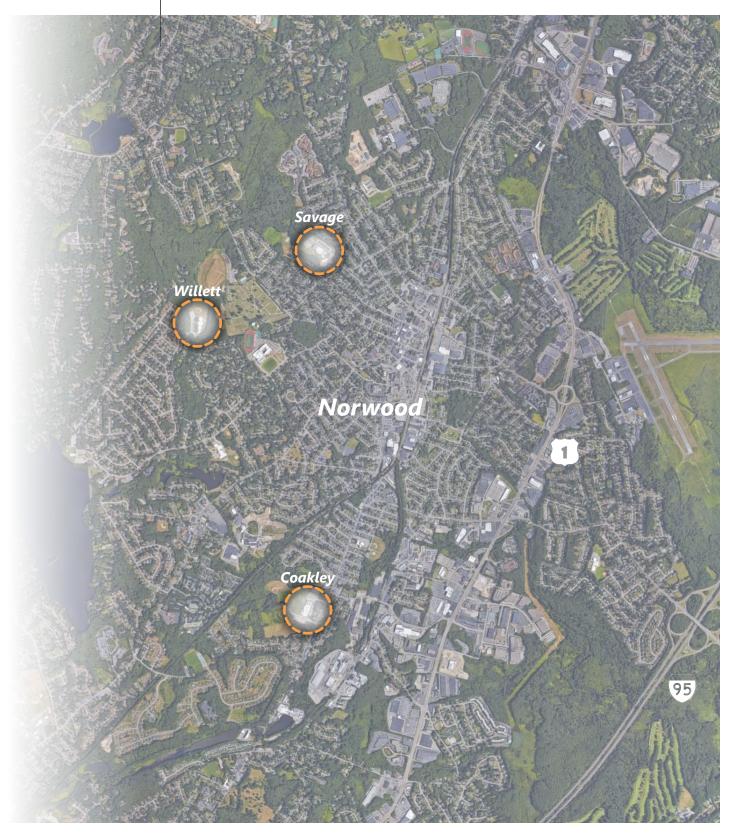

### **Operatives & Phasing**

Phase I = submit a statement of interest to the MSBA for a new middle school; 2019

- (+) grade 5 to new middle school on Coakley site for grades 5 to 8 Phase II = complete 2020
  - (+) kindergarten to Oldham, Cleveland, and Prescott
  - Phased/occupied additions to Oldham and Cleveland with comprehensive renovations; occurs while middle school is being reviewed by the MSBA

Phase III = complete 2021

- New middle school construction on Coakley site is completed Phase IV = ongoing
  - Prescott, Willett and Callahan receive capital repairs

Option 4A: Buildings remaining in operation within the Town of Norwood

# Option 4A

This option reduces the number of buildings in operation as schools. Grade 5 is moved to a newly constructed middle school, reducing the stress at the elementary schools until a newly constructed early childhood education/elementary school is constructed. The community programs and district offices at the Savage Center can remain as is, without disturbance.

# **Proposed Grade Levels & Square Footages per School**

# **Willett with Coakley Middle School**

#### **Advantages**

- Substantially reduces the number of buildings in operation
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By constructing a new combined early education and elementary school building, the town is better able to meet the goals of its educational visioning and program
- Simple phasing

#### **Disadvantages**

- The sole elementary school would be located in west Norwood, perhaps inconveniencing those with homes in other communities
- Traffic congestion in an effort to deliver 1,000+ students at each of the two designated school lots

#### **Operatives & Phasing**

Phase I = complete 2020

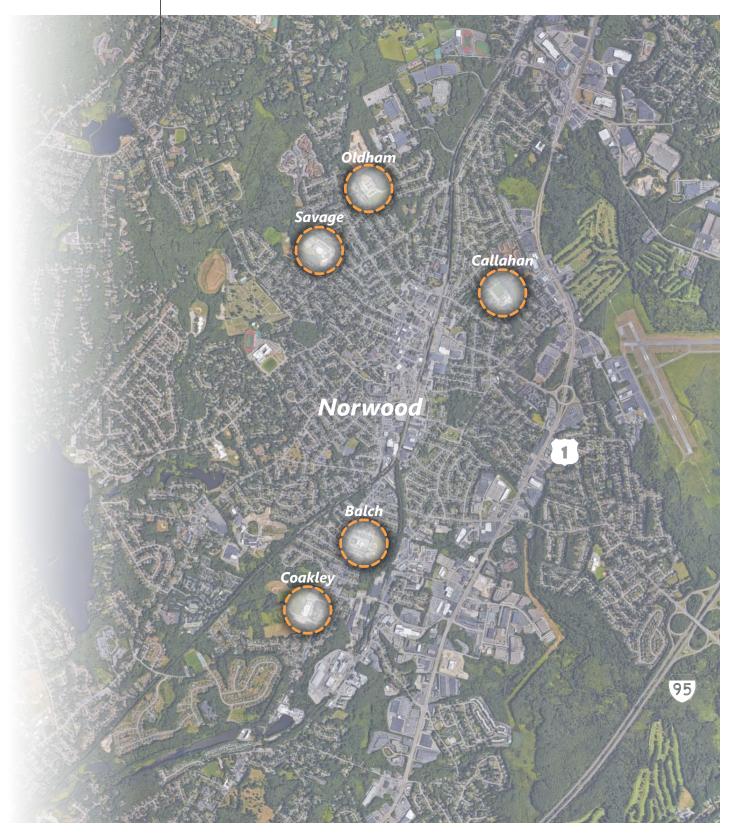

- (+) grade 5 to new middle school on Coakley site for grades 5 to 8
- Balch, Callahan, Cleveland, Oldham, and Prescott close

Phase II = complete 2022

• Addition and comprehensive renovation to Willett

Phase III = ongoing

• Savage operates as is with capital repairs

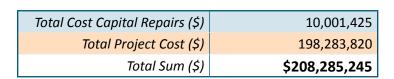

Option 4B: Buildings remaining in operation within the Town of Norwood

# Option 4B

This option reduces the number of buildings in operation as schools. Grade 5 is moved to a newly constructed middle school, reducing the stress at the elementary schools until two newly constructed early childhood education/elementary schools are constructed. The remaining school buildings, Balch and Callahan, can be used instead for the programs leaving the Savage Center, if so desired.

# **Proposed Grade Levels & Square Footages per School**

Additions (\$)								
New Project (\$)				56,922,530			56,922,530	84,438,760
Priority Rating	IV	IV		II			III	1

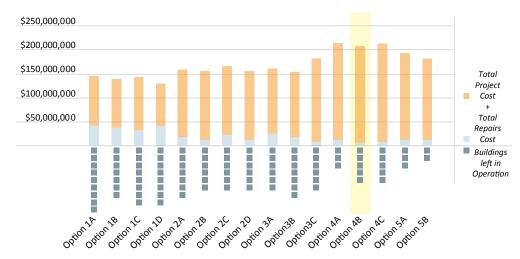

# **Oldham Elementary School**

# **Advantages**

- Reduces number of buildings in operation from eight to five
- By constructing a new middle school, congestion in the lower grades will be relieved, and the design can be tailored to fit the needs of the community
- By constructing two new combined early education and elementary school buildings, the town is better able to meet the goals of its educational visioning and program
- There would be a pre-k to grade 4 school at both the northern and southern ends of town
- Community programs at Balch will still engage southern Norwood
- Moving district administration to Callahan will allow the vintage building to continue service while also providing more space than Savage for offices

### **Disadvantages**

- The department of Buildings and Grounds will still be responsible for maintaining five buildings, plus the high school
- High initial cost for demolition and to construct three new schools, all 100,000+ square feet
- Complex phasing required to avoid disruption to students as much as possible

### **Operatives & Phasing**

Phase I = complete 2020

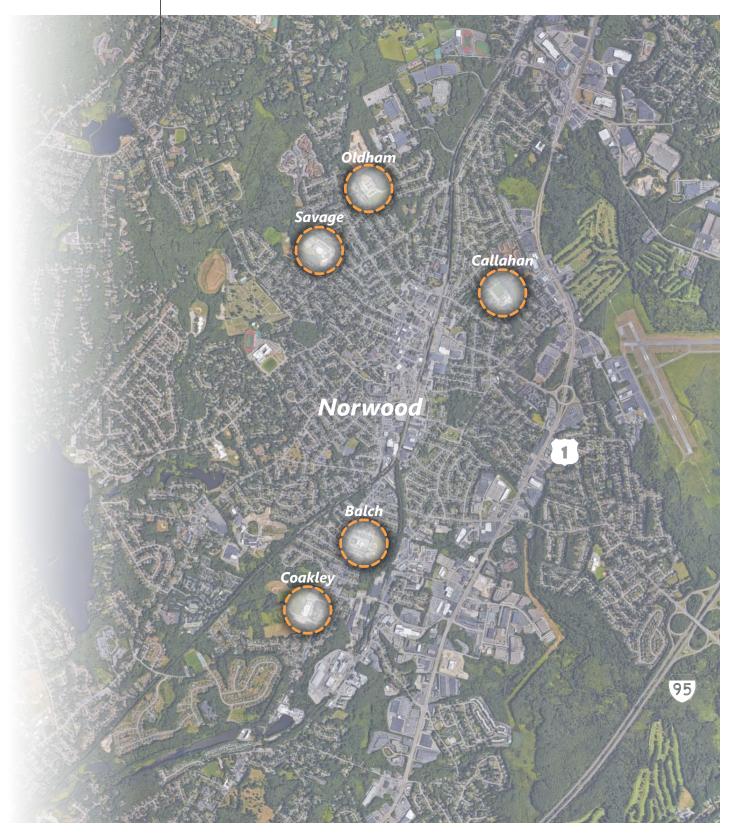

- (+) grade 5 at new middle school on Savage site for grades 5 to 8 Phase II = complete 2023
  - New early education/elementary school on Oldham site for grades pre-k to 4
  - (+) grades 1 to 4 from Oldham, Callahan, and half of Cleveland

Phase III = complete 2026

- New early education/elementary school on Coakley site for grades pre-k to 4
- (+) grades 1 to 4 from Balch, Prescott, and half of Cleveland
- Close Prescott, Cleveland, and Willett

Phase IV = ongoing capital repairs

Balch and Callahan refurbished for community program use

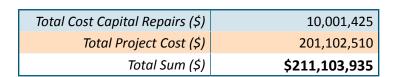

Option 4C: Buildings remaining in operation within the Town of Norwood

# Option 4C

This option reduces the number of buildings in operation as schools. A newly constructed middle school for grades 6-8 is top priority, and two newly constructed early childhood education/elementary schools are planned for as well. The remaining school buildings, Balch and Callahan, can be used instead for the programs leaving the Savage Center, if so desired.

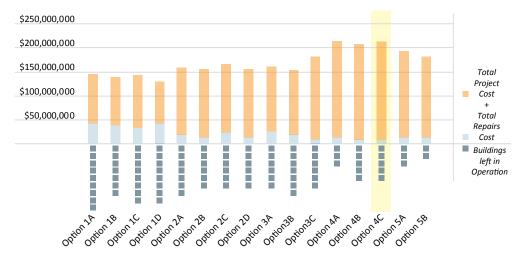

# **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Proposed Grades	N/A	N/A		PK-5			PK - 5	6 - 8
2027 Students (#)	0	0		919			920	779

Renovations (\$)								
Additions (\$)								
New Project (\$)				65,122,995			65,122,995	70,856,520
Priority Rating	IV	IV		III			II	I

#### **Advantages**

- Reduces number of buildings in operation from eight to five
- Completely new middle school resolves inadequacy of existing Coakley school
- By constructing two new combined early education and elementary school buildings, the town is better able to meet the goals of its educational visioning and program
- There would be a pre-k to grade 5 school at both ends of the town
- Community programs at Balch will still engage southern Norwood
- Moving district administration to Callahan will allow the vintage building to continue service while also providing more space than Savage for offices

#### **Disadvantages**

- Does not immediately resolve over-crowding issues at the elementary and early education level
- The department of Buildings and Grounds will still be responsible for maintaining five buildings, plus the high school
- High initial cost for demolition and to construct three new schools, all 100,000+ square feet
- Complex phasing required to avoid disruption to students as much as possible
- A new middle school on the Savage site will have to consider the Senior Center

#### **Operatives & Phasing**

Phase I = complete 2020

New middle school on Savage site for grades 6 to 8

Phase II = complete 2023

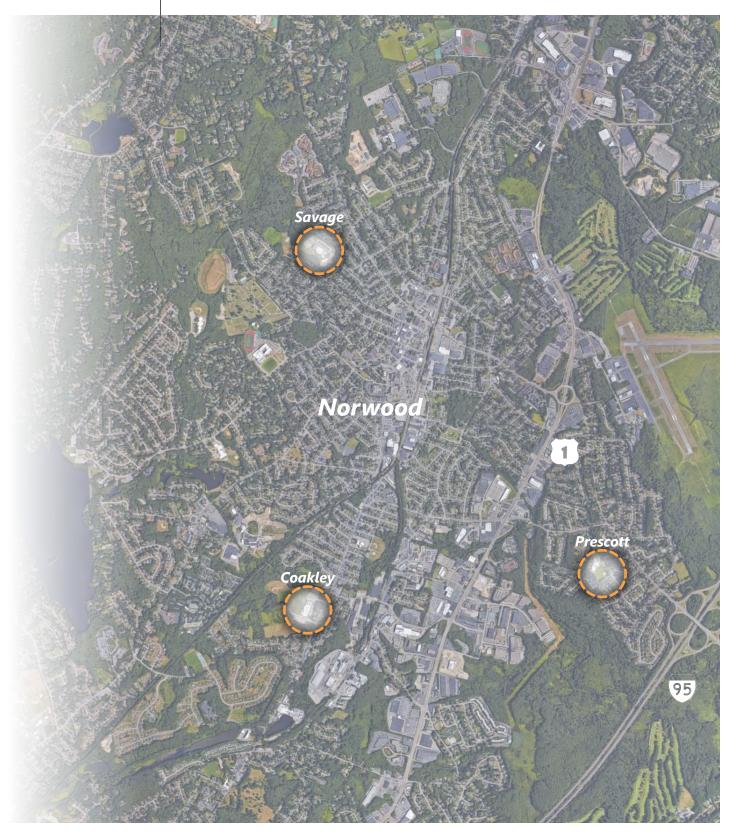

- New early education/elementary school on Coakley site for grades pre-k to 5
- (+) grades 1 to 5 from Balch, Prescott, and half of Cleveland; close Prescott

Phase III = complete 2026

- New early education/elementary school on Oldham site for grades pre-k to 5
- (+) grades 1 to 5 from Oldham, Callahan, and half of Cleveland
- Close Cleveland, and Willett

Phase IV = ongoing

Balch and Callahan refurbished for community program use

Option 5A: Buildings remaining in operation within the Town of Norwood

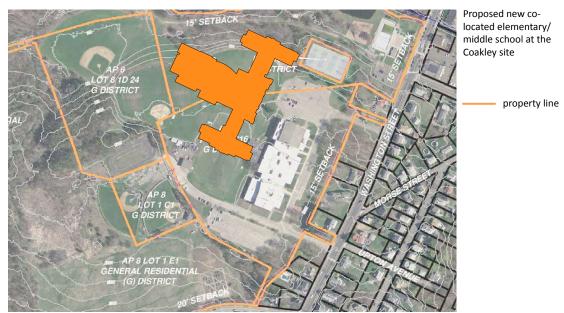

# Option 5A

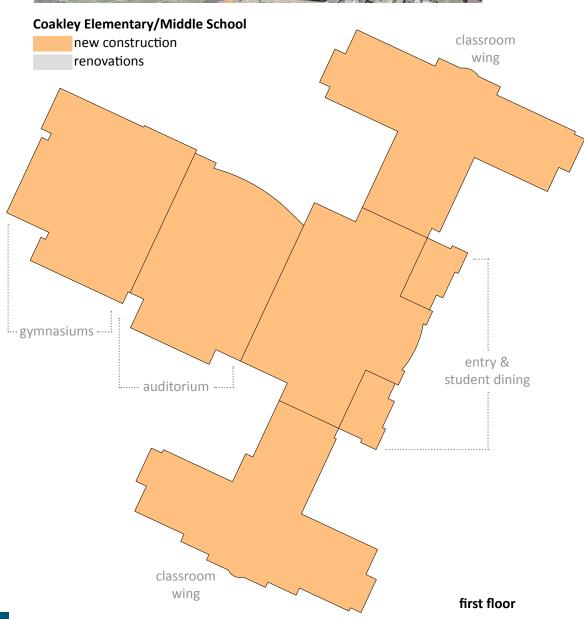

This option reduces the number of buildings in operation altogether. Grades 1-5 are moved to a newly constructed co-located elementary/middle school, reducing the stress at all schools. The Prescott is re-used as the new early childhood education center, made possible with an addition. The Savage Center continues operation as is.

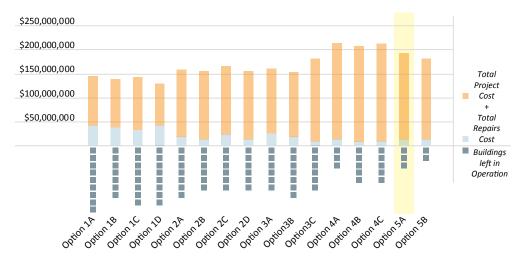

# **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Proposed Grades					PK - K		1 - 8	N/A
2027 Students (#)					454		2,164	0
Existing (sf)					36,000			122,000
Proposed Add (sf)					37,500			
Existing + Add (sf)					73,500			
New (sf)							319,231	
Cap. Repairs (\$)								14,304,500
Renovations (\$)					11,818,800			
Additions (\$)					17,587,500			
New Project (\$)							149,719,339	
Priority Rating					II		I	III

14,304,500	Total Cost Capital Repairs (\$)
179,125,639	Total Project Cost (\$)
\$193,430,139	Total Sum (\$)

# **Advantages**

- Reduces number of buildings in operation from eight to three
- By constructing a new co-located elementary/middle school, congestion in all grades will be relieved, and the design can be tailored to fit the needs of the community. The advantages of a co-located school are many, such as:
  - has the most efficient building footprint and envelope
  - less costly in the long term with more efficient operational systems
  - logical adjacencies and organization
  - shorter, single-phase construction time frame
  - less disruption to students and staff
  - better distribution of resources
  - less unknowns or unanticipated conditions during construction
- The existing design of Prescott is suitable for re-use as an early childhood education center, with an addition
- New construction does not affect all existing programs at the Savage Center

#### **Disadvantages**

- High immediate cost
- Would require an immense series of land plots in order to accommodate the building footprint, parking, and athletic fields
- No other district in the Commonwealth has consolidated as many as six schools, housing a population of 2,000+ students

# **Operatives & Phasing**

Phase I = complete 2020

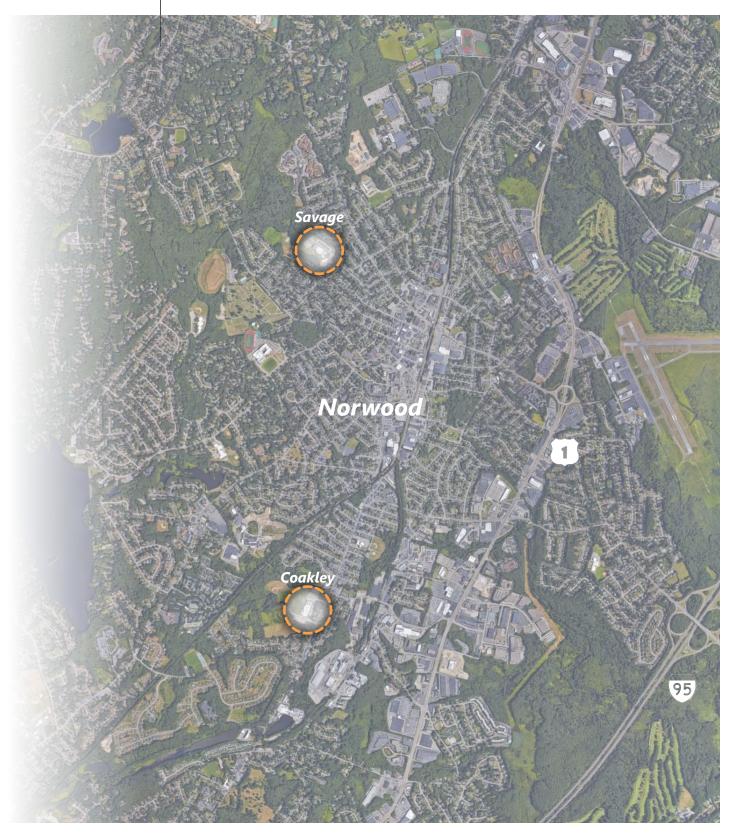

- (+) grade 1 to 5 at new co-located elementary/middle school on Coakley site for grades 1 to 8
- Balch, Callahan, Cleveland, and Oldham close

Phase II = complete 2022

• (+) kindergarten and pre-k to Precott Elementary, which receives an addition and comprehensive renovation; Willett closes

Phase III = ongoing

• Savage operates as-is with capital repairs

Option 5B: Buildings remaining in operation within the Town of Norwood

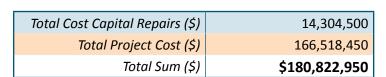

# Option 5B

This option offers complete consolidation. All students below high school are moved to a newly constructed co-located elementary/middle school, reducing stress from over-crowding town-wide. The Savage Center continues operation as is.

# **Proposed Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage

Renovations (\$)								
Additions (\$)								
New Project (\$)							166,518,450	
Priority Rating							I	II

# **Summary of Costs**

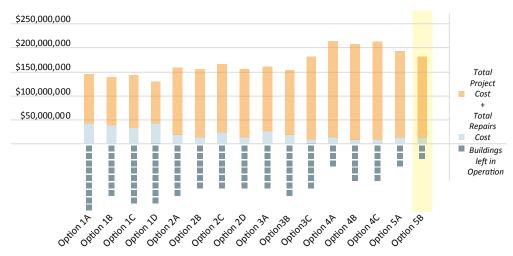

## **Compared to Other Options**

# **Advantages**

- Reduces number of buildings in operation from eight to two
- By constructing a new co-located elementary/middle school, congestion in all grades will be relieved, and the design can be tailored to fit the needs of the community. The advantages of a co-located school are many, such as:
  - has the most efficient building footprint and envelope
  - less costly in the long term with more efficient operational systems
  - logical adjacencies and organization
  - shorter, single-phase construction time frame
  - less disruption to students and staff
  - better distribution of resources
  - less unknowns or unanticipated conditions during construction
- New construction does not affect all of the existing programs at the Savage Center

### **Disadvantages**

- High immediate cost
- Would require an immense series of land plots in order to accommodate the building footprint, parking, and athletic fields
- No other district in the Commonwealth has consolidated as many as six schools, housing a population of 2,500+ students

## **Operatives & Phasing**

Phase I = complete 2020

- (+) all grades at new co-located elementary/middle school on Coakley site for grades pre-k to 8
- Balch, Callahan, Cleveland, Oldham, Prescott, and Willett close

Phase II = ongoing

• Savage operates as-is with capital repairs

Feasibility Study & Long Range Plan - Norwood Public Schools

# Capital Repairs Approach

Also known as the "Do Nothing Approach", this option simply lists the costs associated with continuing to operate every school building as is. There is no proposed new construction. Types of capital repairs/improvements are:

- Scheduled replacement of building systems and components
- Technology and security improvements
- Review and redistribution of space needs
- Site and landscape improvements
- Phased renovations of portions of a school
- Roof and window replacement to increase energy efficiency

# **Existing Grade Levels & Square Footages per School**

	Balch	Callahan	Cleveland	Oldham	Prescott	Willett	Coakley	Savage
Proposed Grades	1-5	1 - 5	1 - 5	1 - 5	1-5	PK - K	6 - 8	N/A

New Project (\$)								

### **Summary of Costs**

58,425,675	Total Cost Capital Repairs (\$)
0	Total Project Cost (\$)
\$58,425,675	Total Sum (\$)

## **Disadvantages**

- Does not address issues of over-crowding or plan for population growth
- The department of Buildings and Grounds will still be responsible for maintaining eight buildings, plus the high school
- The older the buildings get, the more they will require updates and repairs
- High long-term costs associated with maintaining all buildings as they are, and little to no funding is provided by the MSBA for such repairs

Feasibility Study & Long Range Plan - Norwood Public Schools

# V.

# **Executive Summary**

# Recommendations

After reviewing the enrollment projections, existing school environments, existing building conditions, current educational philosophies, and the concerns of the Building Committee and community at large, the following conclusions were established regarding the highest priorities facing the Norwood Public Schools:

Priority 1: The most significant educational facility challenge facing the Norwood Public School system is the lack of an appropriate 21st Century middle school environment. The lack of appropriately sized classrooms and educational support spaces, combined with aged building systems and components, creates a very challenging environment that is grossly insufficient when compared to surrounding Districts. Many proposed options for addressing the long-term needs of all Norwood school facilities are contained within this long-range study and report, and each of them is intended to initiate a thoughtful dialogue regarding the future of Norwood's school facilities. However, every option included herein identifies the middle school as the highest priority for the Town and the first project which should be addressed.

The middle school educational environment has changed dramatically over the past four decades (since Coakley was designed and constructed), as educators and parents began to realize that young adolescents are not simply older elementary school students nor younger high school students, but that there are dramatic changes that occur during this time of life requiring a radically different and unique approach to education. Middle school educators found that the biological event of puberty fundamentally disrupts the relatively smooth development of the elementary school years and has a profound impact upon the cognitive, social, and emotional lives of young teens. In line with this important insight, they saw the need for the provision of special instructional, curricular, and administrative changes in the way that education takes place for kids in early adolescence. Among those changes were the establishment of a mentor relationship between teacher and student, the creation of small communities of learners, and the implementation of a flexible interdisciplinary curriculum that encourages active and personalized learning. Newly created middle schools designed to support these changes quickly proved beneficial to the support of teaching, learning, socialization, and student confidence. These supportive middle school environments include small and large group study and instruction spaces, larger flexible classrooms, smaller academic neighborhoods, project-based learning laboratories, student socialization areas, and many other critical components and spaces. These new middle schools, often referred to as 21st century Middle Schools, differ dramatically from those of several decades ago. People often imagine middle school students sitting in straight rows, listening intently to the teacher and reading from the same book, this is no longer the case. Students work in small groups, perform different learning tasks and learn from different books. They integrate real-world problems and projects into their daily academic learning, and are often collaborating

with other students and presenting their ideas and concepts to their peers. These activities are greatly restricted in older facilities with undersized, inflexible classrooms with no small or large group support spaces and no project labs.

Despite the best efforts by faculty and staff to offer a modern middle school education within the confines of the existing facility, the Coakley Middle School facility does not represent a 21st Century middle school learning environment. It was designed almost 50 years ago and is based on long-outdated principles and concepts. Its educational deficiencies are fully detailed herein, as well as the numerous physical challenges created by its dated building systems and components, which have been maintained well beyond their intended life expectancy. The undersized and overcrowded school relies on six 20-year-old modular classrooms which are somewhat isolated from the remainder of the school and were never intended to be a permanent solution for an appropriate middle school instructional environment. The building is an extremely inefficient all-electric facility that is very expensive to operate and has a poorly insulated building envelope. It relies almost 100% on mechanical ventilation, resulting in poor fresh air ventilation in many areas of the building.

Subsequent to reviewing and discussing all of the options contained within this report, the Norwood Schools Long-Range Planning Committee was unanimous in their desire to recommend that the Town act immediately to address the middle school. The critical role that the middle school environment plays in addressing the specific cognitive, social, and emotional needs of Norwood's students and supporting their teachers is much too important to be ignored, and the inadequacies of the current facility requires immediate action. The Committee also recognized that although all options recommended that the town immediately address the middle school, those options that proposed a 5th through 8th middle school had the added benefit of resolving overcrowding across all of the elementary schools by removing the 5th grade population from the elementary schools. The Committee also reviewed other Districts and found this (5th through 8th grade middle school model) to be a common practice for enhancing 5th grade educational opportunities. Ultimately, the Committee voted to recommend that the Town consider moving forward immediately with the necessary steps to have the middle school project submitted to the Massachusetts School Building Authority (MSBA) for consideration of grant funding. The details of the exact proposed project at the middle school (renovation, expansion, or new school construction) will ultimately be developed through a lengthy and detailed process as prescribed by MSBA guidelines. However, the Committee did express their support for consideration of a 5th through 8th middle school as part of this planning process.

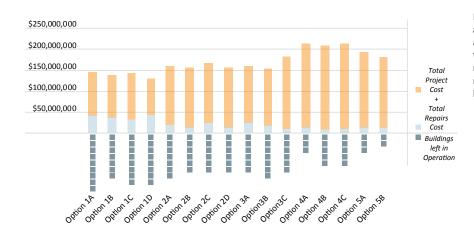

The process of entering the middle school into the MSBA grant program would result in several years of planning and analysis before any construction would occur and would give the Town plenty of time to consider other recommendations contained within this Long-Range Planning Study. This includes future planning options associated with improvements, renovation, or replacement of the elementary schools. There are numerous options contained herein, with all of them fitting within categories 1 through 4, with variations labeled A, B, C, and D in some categories. These options include:

- Option 1A
- Option 2A
- Option 3A
- Option 4B

- Option 1B
- Option 2B
- Option 3B
- Option 4C

- Option 1C
- Option 2C
- Option 3C
- Option 5A

- Option 1D
- Option 2D
- Option 4A
- Option 5B

Bar chart comparing all options to one another based on total project cost, total repairs cost, and the number of buildings left in opeartion

As stated previously, all options propose proceeding to address the middle school as the highest priority. The variations in the options can be categorized into three major areas.

### 1. The amount of school consolidation

Category 1 options involve leaving all of the existing elementary school facilities in their current locations and proposes to address all school needs without closing any existing elementary schools. Category 5 options are on the opposite end of the spectrum, proposing an enormous amount of consolidation and the closing of several elementary schools. The Long-Range Planning Committee ultimately determined that subsequent to addressing the middle school as a priority, the Town should consider some level of consolidation in order to improve educational opportunities at the smaller elementary schools and improve operational efficiency for the Town. The Committee voted to reject extreme consolidation such as that identified in Options 5A and 5B but supported consideration for some consolidation such as that proposed in Options 2 through 4. Discussions regarding the appropriate balance of consolidation can occur over the next few years as the middle school is being addressed.

# 2. The specific schools that might be considered for consolidation in the future

The various options include different consolidation scenarios and therefore the specific schools which are proposed for closing vary within each option.

## 3. Middle school grade configuration (4th-8th), (5th-8th), or (6th-8th)

Although all options propose proceeding with addressing the middle school as the highest priority, some options propose a 4th-8th grade or a 5th-8th grade middle school over the current 6th-8th grade middle school configuration. After consideration and discussion of all options, the Committee voted unanimously to recommend that the School Department and the Town at least consider the possibility of a 5th-8th grade middle school. They subsequently voted to favor those options which utilize a 5th-8th grade middle school and simultaneously considered some amount of consolidation. A 5th-8th grade middle school project (either renovation, expansion, or all-new construction) would allow the Town to address the middle school needs while simultaneously providing overcrowding relief at the elementary schools. It would also have the net effect of placing two-thirds of the Norwood students (grades 5 through 12) into new facilities and

# Feasibility Study & Long Range Plan - Norwood Public Schools

freeing up additional space in the elementary schools, thereby improving programming and educational delivery in grades PK-4. The single 5-8 middle school project could have an impact across all grade levels, PK-8, thereby improving educational opportunities Town-wide.

School Committee Presentation from August 16, 2017

# The MSBA Process

**Step 1:** Communication & Presentation of the Study The Feasibility Study and Long Range Plan for Norwood Public Schools

Step 2: Consider Submittal of MSBA Statement of Interest (SOI)

The Town of Norwood should begin to consider the submittal of an SOI to the MSBA that names the Middle School as a district priority.

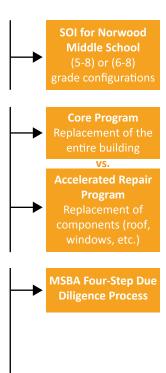

**Step 3:** Submit MSBA Statement of Interest (SOI)

### **Purpose**

- An SOI allows the MSBA to determine "those schools that are most urgent and needy" by identifying a school building's deficiencies
- An SOI allows a district to partner with the MSBA in an effort to understand a school building's true deficiencies; Norwood can explore the benefits of a new middle school with either a 5-8 grade configuration or a 6-8 grade configuration.

# Filing Period & Process

- The SOI period opens in early January, but a district should only file if it has the ability to fund a project in the next two years
- The SOI period closes each April, and decisions of the SOI are generally made by the MSBA in late fall of each year
- Following is a four-step Due Diligence Process by the MSBA for all SOIs:
  - 1. Review SOI submissions for completeness
    - A hard copy of the SOI with the required signatures
    - A hard copy of the Closed Schools Certification
    - Hard copies of the required local vote documentation
    - Any supporting materials required to be submitted with the SOI
  - 2. Review SOI submissions & accompanying documents for content
    - The MSBA uses 50+ data points in their analysis of SOI applications
    - Utilizes a "Needs Survey" that assesses building systems, space utilization, classrooms/core spaces, and technology of the facility
  - 3. Conduct Senior Study visits, if required
    - This is a site visit by an MSBA team to review the physical conditions and programmatic experience of the submitted school
  - 4. Recommend SOIs for invitation into the Eligibility Period
    - The MSBA compares district SOIs selected for review to each other
    - Once recommendations from the MSBA CEO, Board of Directors, and Facilities Assessment Subcommittee have been accepted, the district will receive an invitation into the Eligibility Period from the Board of Directors

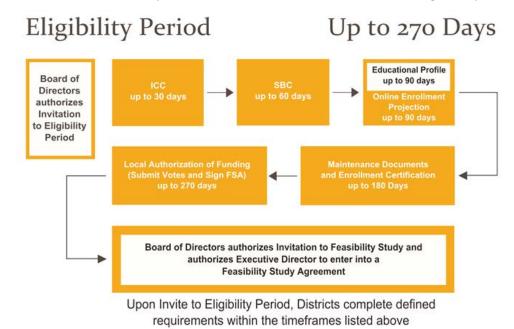

**▶** Eligibility Period

### Step 4: MSBA Eligibility Period (Module 1)

The Eligibility Period assists the MSBA with managing its financial resources. Early in the process, it identifies whether a district is ready to manage and fund a capital project.

- 1. Execute an Initial Compliance Certification (ICC)
  - Proof that the district understands the grant programs rules
- 2. Form a School Building Committee (SBC)
- 3. Complete an Educational Profile Questionnaire
  - Helps the MSBA understand the true needs of the district and its goals
- 4. Summary of District's Existing Maintenance Practices
- 5. Establish a Design Enrollment
  - Establishes size of proposed new project based on projected needs
- 6. Confirmation of Community Authorization & Funding to Proceed
- 7. MSBA Feasibility Study Agreement
  - Establishes a process for the district to be reimbursed for eligible expenses

Step 5: Community Outreach

Community outreach presentations should occur periodically throughout the Eligibility Period to ensure that the Building and School Committees are acting in the best interest of its community members. The district will be unable to continue participation in an MSBA Core Program without community authorization.

School Committee Presentation from August 16, 2017

## The MSBA Process

**Step 1:** Communication & Presentation of the Study The Feasibility Study and Long Range Plan for Norwood Public Schools

Step 2: Consider Submittal of MSBA Statement of Interest (SOI)

The Town of Norwood should begin to consider the submittal of an SOI to the MSBA that names the Middle School as a district priority.

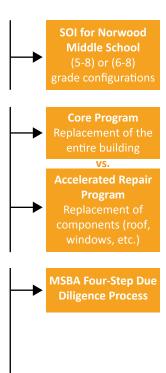

**Step 3:** Submit MSBA Statement of Interest (SOI)

#### **Purpose**

- An SOI allows the MSBA to determine "those schools that are most urgent and needy" by identifying a school building's deficiencies
- An SOI allows a district to partner with the MSBA in an effort to understand a school building's true deficiencies; Norwood can explore the benefits of a new middle school with either a 5-8 grade configuration or a 6-8 grade configuration.

#### Filing Period & Process

- The SOI period opens in early January, but a district should only file if it has the ability to fund a project in the next two years
- The SOI period closes each April, and decisions of the SOI are generally made by the MSBA in late fall of each year
- Following is a four-step Due Diligence Process by the MSBA for all SOIs:
  - 1. Review SOI submissions for completeness
    - A hard copy of the SOI with the required signatures
    - A hard copy of the Closed Schools Certification
    - Hard copies of the required local vote documentation
    - Any supporting materials required to be submitted with the SOI
  - 2. Review SOI submissions & accompanying documents for content
    - The MSBA uses 50+ data points in their analysis of SOI applications
    - Utilizes a "Needs Survey" that assesses building systems, space utilization, classrooms/core spaces, and technology of the facility
  - 3. Conduct Senior Study visits, if required
    - This is a site visit by an MSBA team to review the physical conditions and programmatic experience of the submitted school
  - 4. Recommend SOIs for invitation into the Eligibility Period
    - The MSBA compares district SOIs selected for review to each other
    - Once recommendations from the MSBA CEO, Board of Directors, and Facilities Assessment Subcommittee have been accepted, the district will receive an invitation into the Eligibility Period from the Board of Directors

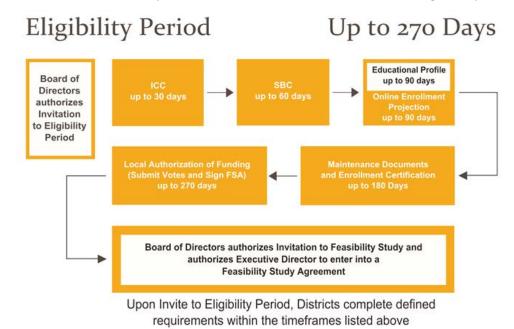

**▶** Eligibility Period

#### Step 4: MSBA Eligibility Period (Module 1)

The Eligibility Period assists the MSBA with managing its financial resources. Early in the process, it identifies whether a district is ready to manage and fund a capital project.

- 1. Execute an Initial Compliance Certification (ICC)
  - Proof that the district understands the grant programs rules
- 2. Form a School Building Committee (SBC)
- 3. Complete an Educational Profile Questionnaire
  - Helps the MSBA understand the true needs of the district and its goals
- 4. Summary of District's Existing Maintenance Practices
- 5. Establish a Design Enrollment
  - Establishes size of proposed new project based on projected needs
- 6. Confirmation of Community Authorization & Funding to Proceed
- 7. MSBA Feasibility Study Agreement
  - Establishes a process for the district to be reimbursed for eligible expenses

Step 5: Community Outreach

Community outreach presentations should occur periodically throughout the Eligibility Period to ensure that the Building and School Committees are acting in the best interest of its community members. The district will be unable to continue participation in an MSBA Core Program without community authorization.
